Front End Engineer / YDN Evangelist / Software Engineer

Translating visual designer's mockup into the web pages. Implementing with Browser Compatibility, Web Standard, Accessibility, Maintainable, Progressive Enhancement and Unobtrusive JS.

AAEON

Jun 2004 - Aug 2005 (1.3 years)

Engineer

Built systems including Sales Funnel and Early Registration for Distributors. Also provide support to help implementing workflow systems.

⚙ Skills

Basis: Handwriting HTML/CSS/JavaScript

OOP: Native JavaScript and YUI Infrastructure

Module: RequireJS and YUI Module

Libraries: YUI, jQuery, and Twitter Bootstrap

Toolbox: Git, Vim, and Grunt on Mac and Linux

Server-side: PHP, Rails, and ASP.NET

Preprocessor: Coffee and Compass

MVC: YUI (Backbone.js)

Compatibility: Since IE6

🎓 Education

Tunghai University 1997 - 2002

BA, Foreign Language and Literature

Good Front End Developer is a hybrid with different elements. Literature leads me to think deeper. Language enforces me to keep things semantic and understandable.

I made a parrot community website when I was sophomore and it had over 3,000 visitors per day.
